NOTE REGARDING NON-GAAP FINANCIAL MEASURES

CECO is providing certain non-GAAP historical financial measures as presented above as we believe that these figures are helpful in allowing individuals to better assess the ongoing nature of CECO's core operations. A "non-GAAP financial measure" is a numerical measure of a company's historical financial performance that excludes amounts that are included in the most directly comparable measure calculated and presented in accordance with GAAP.

Non-GAAP operating income, non-GAAP net income, non-GAAP operating margin, non-GAAP earnings per basic and diluted share and adjusted EBITDA, as we present them in the financial data included in this press release, have been adjusted to exclude the effects of amortization expenses for acquisition related intangible assets, contingent retention and earnout expenses, restructuring expenses primarily relating to severance and legal expenses, acquisition and integration expenses which include retention, legal, accounting, banking, and other expenses, foreign currency remeasurement and other nonrecurring or infrequent items and the associated tax benefit of these items. Management believes that these items are not necessarily indicative of the Company's opoing operations and their exclusion provides individuals with additional information to compare the Company's results over multiple periods. Management utilizes this information to evaluate its ongoing financial performance. Our financial statements may continue to be affected by items similar to those excluded in the non-GAAP adjustments described above, and exclusion of these items from our non-GAAP financial measures should not be construed as an inference that all such costs are unusual or infrequent.

Non-GAAP operating income, non-GAAP net income, non-GAAP operating margin, non-GAAP earnings per basic and diluted share and adjusted EBITDA are not calculated in accordance with GAAP, and should be considered supplemental to, and not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. Non-GAAP financial measures have limitations in that they do not reflect all of the costs associated with the operations of our business as determined in accordance with GAAP. As a result, you should not consider these measures in isolation or as a substitute for analysis of CECO's results as reported under GAAP. Additionally, CECO cautions investors that non-GAAP financial measures used by the Company may not be comparable to similarly titled measures of other companies.

In accordance with the requirements of Regulation G issued by the Securities and Exchange Commission, non-GAAP operating income, non-GAAP net income, non-GAAP operating margin, non-GAAP earnings per basic and diluted share and adjusted EBITDA stated in the tables above are reconciled to the most directly comparable GAAP financial measures.
